CONSTRUCTION ENTERPRISE SHOWS NEW INVENTIONS;  
NEW-TYPE THRESHING MACHINE TO BE PRODUCED

PRESENTS EXPOSITION OF NEW INVENTIONS -- Bucharest, Constructorul, 24 Nov 51

A leading construction enterprise in Rumania recently organized an exposition of its numerous inventions. Among the items shown was an apparatus for measuring transversal shifts in tunnels, invented by M. Stanculescu, who was awarded a prize of 90,000 lei. Also shown were such machines as sprayer fuel pumps for four-cylinder diesel motors, a macadam drier, a float to regulate the water level in steam boilers, apparatus for ammonia treatment of photo-sensitive paper, various tools, hoists for raising sheet piling, molds for laying asphalt, a form for cutting, shaping, and bending clamps, and many other inventions.

The exposition contained many important entries. Of a total of 138 new inventions, 66 were presented by workers, 26 by technicians, and 46 by engineers. Of these, 28 were approved and 104 are now under study by the appropriate ministry. The approved inventions mean an economy to the nation of 57 million lei. These inventions also brought 837,150 lei in prize money to the inventors.

CONSTRUCT NEW-TYPE THRESHING MACHINE -- Bucharest, Romania Libera, 19 Dec 51

The collective of a large factory in Craiova has begun the construction of a new type of threshing machine.

The machine will be able to thresh four carloads of grain in 10 hours. The first machine of this type is approximately 85 percent completed. A pledge was made that work on the first machine will be completed by 21 December.
